

## GENUINE KSB Card Readers (2016)

KSB card readers come in two flavors: one casing protrudes (to the left) and the other is flat (bottom-left and right – the bottom-right is lit up). Close-ups are on page 2.

Scammers now make skimmers that look very similar – they can be green, slightly transparent, and can be made to fit over the existing card reader.

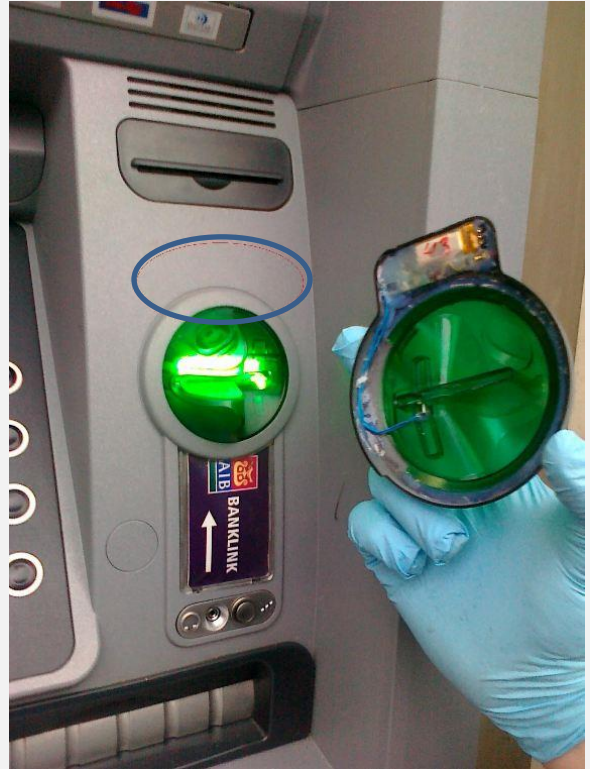

**GENUINE KSB ATM Decal (2016)** – should be flush with the machine.

Unless otherwise noted, the rest of the photos below are courtesy of Krebs on Security ([krebsonsecurity.com](http://krebsonsecurity.com)).

## FRAUDULENT Card Readers

Early 2011 in Ireland

Note the small plastic lip above the card reader (circled in blue while attached and the area it occupied after removal): the only telltale sign of this skimmer.

## FRAUDULENT PIN Pad Overlay
